

Kata 9 - Case Maker

Assignment

50 - 120 minutes

✔ Status

Complete

STRETCH ACTIVITY
This activity is marked as stretch. We strongly suggest you come back to it if/when you've completed all the core exercises for the prep course.

In this exercise, we will be converting a normal string into camelCase text.

Case Maker

We will receive a normal string of words separated with spaces as the input. Our job is to convert these strings into camel cased strings.

Input

```
const camelCase = function(input) {  
  // Your code here  
};  
  
console.log(camelCase("this is a string"));  
console.log(camelCase("loopy lighthouse"));  
console.log(camelCase("supercalifragalisticexpialidocious"));
```

Output

```
thisIsAString  
loopyLighthouse  
supercalifragalisticexpialidocious
```

 Create a function named `camelCase` that will convert a string to camel case, and return the result.

Submit Your Work

- Browse to gist.github.com and create a new gist.
- Copy-and-paste your code into the form
- Name the gist and the file appropriately and click **Create secret gist**.
- Finally, mark this activity as completed (at the bottom of this page) and please copy/paste the *entire* browser URL for your gist (from *gist.github.com*) into the text field.
