

# Kata 10 - Multiplication Table

Assignment

65 - 90 minutes

✔ Status

Complete

**STRETCH ACTIVITY**  
This activity is marked as stretch. We strongly suggest you come back to it if/when you've completed all the core exercises for the prep course.

In this exercise, we will be printing multiplication tables to the console.

## Multiplication Table

We will be given a number as our input data. This number is the highest value of our multiplication table. Our job is to generate a multiplication table for the values from 1 to the provided number.

### Input

```
const multiplicationTable = function(maxValue) {  
  // Your code here  
};  
  
console.log(multiplicationTable(1));  
console.log(multiplicationTable(5));  
console.log(multiplicationTable(10));
```

### Output

```
1

1 2 3 4 5
2 4 6 8 10
3 6 9 12 15
4 8 12 16 20
5 10 15 20 25

1 2 3 4 5 6 7 8 9 10
2 4 6 8 10 12 14 16 18 20
3 6 9 12 15 18 21 24 27 30
4 8 12 16 20 24 28 32 36 40
5 10 15 20 25 30 35 40 45 50
6 12 18 24 30 36 42 48 54 60
7 14 21 28 35 42 49 56 63 70
8 16 24 32 40 48 56 64 72 80
9 18 27 36 45 54 63 72 81 90
10 20 30 40 50 60 70 80 90 100
```

Create a function named `multiplicationTable` that receives a number `maxValue` as input and creates a square multiplication table where `maxValue` is the largest value in the table.

Submit Your Work

- Browse to [gist.github.com](https://gist.github.com) and create a new gist.
- Copy-and-paste your code into the form
- Name the gist and the file appropriately and click `Create secret gist`.
- Finally, mark this activity as completed (at the bottom of this page) and please copy/paste the *entire* browser URL for your gist (from *gist.github.com*) into the text field.
